

Greg Lyons, (PHECC PIN 9644)

I am married with a young Son, and live in North County Dublin,

I joined the Irish Red Cross in 2001 after doing a First Aid Course in school and since then, I have undertaken many roles; currently I am the Unit Officer in Santry (Dublin Borough)

I was in the first batch of Red Cross EMT's to be trained by the Irish Red Cross. For the past 3 years I have been responsible for the online learning site (Moodle / MCQs) for all Red Cross EMT students nationwide. I am also involved in training for the EMT Students and I hope to achieve my PHECC Assistant Tutor Status some time this year. Recently, I was appointed to the Irish Red Cross National EMT Subgroup, as the EMT Programme Volunteer administration coordinator with responsibility for administration for all of our EMT courses.

Elected to the new General Assembly by Members of Irish Red Cross Youth at the National Youth Forum in November 2011. I am the first ever Youth Representative to serve with full voting rights on the General Assembly and represent all members under the age of 25. Also, Currently a Board Member of the Irish Red Cross, tasked with the overall Management and Governance of the Society.

Keen interest in Communications, Currently I am the Radio Operator Training Programme Manager for the Irish Red Cross Training Working Group.

I work as a Procurement Manager for a large Civil Engineering Company in Dublin which carries out work Nationwide for Local Authorities and Government Agencies.

I am delighted that EMT's are now being given the opportunity to have an input into the clinical practices surrounding this level

I am a very committed EMT who trains and practices regularly in order to maintain my skills. I have a keen interest in helping to develop the EMT programme going forward. The EMT level on the PHECC Practitioner Register is very import and if elected I will attend meetings and contribute constructively to the work of the Medical Advisory Committee (MAC) at EMT level for all PHECC Registered Practitioners.
