

CFR Advanced Assessment Sheet

Course location		Assessment date	
Student name			

Adult BLS – CFR Advanced		Yes (Tick✓)
1	Checks if the scene is safe	
2	Checks whether the patient is responsive	
3	Opens the patient's airway	
4	Checks for breathing & simultaneously checks for pulse (<10 seconds)	
5	Calls out for help/call 112 or 999/ request AED (as appropriate)	
6	Gives 30 chest compressions	
7	Delivers compressions to the correct depth	
8	Delivers compressions at the correct rate	
9	Puts hands in the correct position	
10	Delivers two rescue breaths	
11	Continues cycles of 30 compressions to 2 rescue breaths until AED arrives	
12	Turns on the AED	
13	Clears the patient's chest	
14	Puts the left AED pad on the patient's chest in the correct position	
15	Puts the right AED pad on the patient's chest in the correct position	
16	Ensures operator/bystander safety throughout AED use	
17	Delivers the shock when indicated by the AED	
18	Immediately restarts CPR	
19	Continues cycles of 30 compressions to 2 breaths	
20	Minimal interruptions in compressions	

Instructor notes: Place a ✓ in the box for each step completed successfully. If required, make notes below and provide remediation advice

CFR Advanced Skills Assessment Sheet

Course location		Assessment date	
Student name			

Airway and ventilation – CFR Advanced		Yes (Tick✓)
Airway management technique: Head-tilt, Chin-Lift		
1	Correct hand position on forehead	
2	Correct hand position on chin	
3	Perform head tilt/chin lift	
Oral suctioning		
4	Tests the suction device to make sure the vacuum source is on	
5	Demonstrates the correct method for measuring the catheter	
6	Advance suction tip into mouth under direct visualisation	
7	Applies suction for no more than 15 seconds	
8	Ensure ventilation or oxygenation as appropriate	
Oropharyngeal airway insertion		
9	Measures the appropriate sized airway	
10	Selects appropriate sized airway	
11	Inserts the airway - tip to hard palate	
12	Rotates the airway by 180 degrees	
13	Rests the tip of the airway level with the patient's lips	
14	Ensure patent airway after insertion	
Oxygen therapy: Examiner choose one from NRB, simple, venturi, nasal cannula		
15	Demonstrates how to turn the oxygen supply on	
16	Applies the device to the patient	
Bag-Valve-Mask (BVM)		
17	Connect BVM to oxygen source	
18	Correct hand position on face mask giving good seal	
19	Adequate chest rise achieved	
20	Ensure correct ventilation rate (max 1 every 6 seconds)	
Airway advanced		
21	Selects correct size SGA	
22	Lubricates the device correctly	
23	Inserts the device correctly	
24	Confirm placement by adequate chest rise	
25	Secures the airway in place	

Instructor notes: Place a ✓ in the box for each step completed successfully. If required, make notes below and provide remediation advice

Paediatric – CFR Advanced		Yes (Tick✓)
1	Checks if the scene is safe	
2	Checks whether the patient is responsive	
3	Opens the patient's airway	
4	checks for breathing & simultaneously checks for pulse (<10 seconds)	
5	Calls out for help/call 112 or 999/ request AED (as appropriate)	
6	Give 5 initial breaths	
7	Gives 30 chest compressions (1 or 2 hands for child; 2 fingers for infant)	
8	Delivers compressions to the correct depth (1/3 depth of chest)	
9	Delivers compressions at the correct rate	
10	Puts hands/fingers in the correct position	
11	Delivers two rescue breaths	
12	Continues cycles of 30:2 until AED arrives	
13	Turns on the AED	
14	Places AED pads in correct position	
15	Ensures operator/bystander safety throughout AED use	
16	Delivers the shock when indicated by the AED	
17	Immediately restarts CPR	
18	Change compression to ventilation ratio to 15:2	
19	Continues cycles of 15 compressions to 2 breaths	
20	Minimal interruptions in compressions
