## Personal Statement:

By nature, I am both inquisitive and detailed orientated, but also open-minded. I have a broad industry background having worked with a wide variety of organisations across the public and private sector, while working with Accenture. I find that with each new role, I can not only use my existing knowledge, but that I can learn a wealth of information. I hope to do the same by participating in the committee. Given that my Pre-Hospital experience is heavily linked to the voluntary sector, I would find that to be my strongest source of knowledge and experience; however I believe that my natural open-mindedness would allow me to review the topics and items put before the committee from a multitude of viewpoints. If given the chance to take up a position on the Committee I would ensure that I give it 110% of the focus and commitment that's required.
